on

Ground Water Governance & Food Sustainability

October/November, 2017

Hyderabad

Organized by

**Central Ground Water Board
Ministry of Water Resources,
RD & GR Government of India**

PREAMBLE

Central Ground Water Board (CGWB), an apex organization at national level is working in the field of monitoring, assessment, management, development, quality and protection of ground water resources in the country.

Ground water is the vital resource for catering agriculture, domestic and industrial sector requirements in the country. The ever increasing demands from different sectors led to unplanned and unscientific groundwater development, resulting in cascading effects like declining water levels, failure of shallow bore wells, sustainability and quality deterioration.

Thus regulation and management of groundwater resources is the need of the hour in major parts of the country. Effective governance of groundwater resources has become a growing challenge. Ground water entails the political, social, economic and administrative systems which affect the use, development and management of the resources in the country.

*In order to address various groundwater governance and sustainability issues through wider consultations among various stakeholders, Ministry of Water Resources, River Development and Ganga Rejuvenation through Central Ground Water Board is organizing one day **Bhujal Manthan-3 at Hyderabad** during **October/November, 2017.***

OBJECTIVE

*The main objective of organizing “**Bhujal Manthan-3**” is for brain storming interactions applying collective wisdom amongst various researchers, stakeholders, water managers engaged in ground water resource development management and policy planners to give attention to role of ground water in irrigation, water conservation & recharge and participatory ground water management, ground water sustainability through crop diversification.*

SUB-THEMES

- *Role of Ground Water in Irrigation.*
- *Participatory Ground Water Management.*
- *Water Conservation & Ground water Recharge.*
- *Revival of springs.*
- *Trans Boundary Aquifers.*
