			<p>spells @ 4 hours/spell to increase bore well/GW sustainability.</p> <ul style="list-style-type: none"> <li>• As mandatory measures power connection may be given to only those farmers who are adopting micro irrigation for all new bore well to be constructed.</li> </ul>
(d)	<b>OTHER INTERVENTIONS SUGGESTED</b>	:	<ul style="list-style-type: none"> <li>• Participatory Ground Water Management with community and women participation.</li> <li>• Paddy cultivation during rabi season should be reduced and to be shifted to ID Crops and drought resistant crops. If necessary some regulatory rules may be framed and implemented.</li> <li>• In the existing ground water areas sharing of ground water amongst the users to be encouraged to increase the sustainability of wells by reducing well interference.</li> <li>• The bore well owner should be suitably compensated for the cost of well by funding to farmers for adopting micro irrigation practices by the Govt.</li> </ul>
