(c)	<b>REGULATION &amp; COMMUNITY</b>	1			
10	INTERVENTIONS	-			
19	Regulation and control	:	• WALTA-Act to be implemented		
		1	in true spirit.		

(d)	OTHER INTERVENTIONS SUGGESTED		<ul> <li>Regulation of power supply in 2 spells @ 4 hours/spell to increase bore well/GW sustainability.</li> <li>As mandatory measures power connection may be given to only those farmers who are adopting micro irrigation for all new bore well to be constructed.</li> <li>Participatory Ground Water Management with community and women participation.</li> <li>Paddy cultivation during rabi season should be reduced and to be shifted to ID Crops and drought resistant crops. If necessary some regulatory rules may be framed and implemented.</li> <li>In the existing ground water areas sharing of ground water amongst the users to be encouraged to increase the sustainability of wells by reducing well interference.</li> <li>The bore well owner should be suitably compensated for the cost of well by funding to farmers for adopting micro irrigation practices by the Govt.</li> </ul>
(e)	EXPECTED RESULTS AND OUTCOME		
20	Total Cost of Interventions (Excluding Mission Kakatiya and Bhagiratha)	:	19.25 Cr
21	Likely benefit of Interventions	:	~6.04 MCM ground water can be saved from the above interventions. The stage of Ground water development may likely to be come down by 6 % (from 44 % to 38%).
