(c)	REGULATION & COMMUNITY INTERVENTIONS		
19	Regulation and control	:	<ul> <li>WALTA-Act to be implemented in true spirit.</li> <li>Regulation of power supply in 2</li> </ul>

(d)	OTHER INTERVENTIONS SUGGESTED		spells @ 4 hours/spell to increase bore well/GW sustainability.  As mandatory measures power connection may be given to only those farmers who are adopting micro irrigation for all new bore well to be constructed.  Participatory Ground Water Management with community and women participation.  Paddy cultivation during rabi season should be reduced and to be shifted to ID Crops and drought resistant crops. If necessary some regulatory rules may be framed and implemented.  In the existing ground water areas sharing of ground water amongst the users to be encouraged to increase the sustainability of wells by reducing well interference.  The bore well owner should be suitably compensated for the cost of well by funding to farmers for adopting micro irrigation practices by the Govt.
(e)	EXPECTED RESULTS AND OUTCOME		
20	Total Cost of Interventions (Excluding Mission Kakatiya and Bhagiratha)	:	6.8 Cr
21	Likely benefit of Interventions	:	~2.44 MCM ground water can be saved from the above interventions. The stage of Ground water development may likely to be come down by 5% (from 50 % to 45%).
