

Development of Nanofiltration Membrane Technology for Drinking Water Purification and Water Reclamation for Industrial Use

Name of PI:- Dr. Paramita Ray, Scientist E II, Central Salt & Marine Chemicals Research Institute, Bhavnagar, Gujarat

Objectives :

To develop indigenous, high flux, low cost, antifouling nano membranes and its technology for the water to remove the hardness, harmful ions, impurities, and micro organisms so as to provide potable water.

Sanctioned Cost of the Scheme:- Rs. 24,21,840

Duration and Date of Start :- 3 years, 15.03.2011
