(b)	DEMAND SIDE INTERVENTION		
18	Existing Micro Irrigation Intervention & Gross area irrigated	:	9 Micro irrigation units/0.37 ha
19	Proposed Micro Irrigation	:	0 ha in 0 Villages @ 100 ha in each non command village.
20	Cost for micro-irrigation	:	0 Cr@ 0.60 lakhs per ha.
21	Expected ground water saving from micro-	:	0 MCM of water is expected to be
	irrigation		conserved.
(c)	REGULATION & COMMUNITY INTERVENTIONS		
22	Regulation and control	:	 WALTA-Act to be implemented in true spirit. Regulation of power supply in 2 spells @ 4 hours/spell to increase

(d)	OTHER INTERVENTIONS SUGGESTED		 As mandatory measures power connection may be given to only those farmers who are adopting micro irrigation for all new bore well to be constructed. Participatory Ground Water Management with community and women participation. Paddy cultivation during rabbi season should be reduced and to be shifted to ID Crops and drought resistant crops. If necessary some regulatory rules may be framed and implemented. In the existing ground water areas sharing of ground water amongst the users to be encouraged to increase the sustainability of wells by reducing well interference. The bore well owner should be suitably compensated for the cost of well by funding to farmers for adopting micro irrigation practices by the Govt.
(e) 23	EXPECTED RESULTS AND OUTCOME	Ļ	14 6 Cm
	Total Cost of Interventions (Excluding Mission Kaktiya and Bhagiratha)	i	14.6 Cr
24	Likely benefit of Interventions	:	~5.14 MCM ground water can be saved from the above interventions. The stage of Ground water development may likely to be come down by 4 % (from 56% to 52%).
